western entrepot being taken, the rebels were to be made to "feel the pressure of the Government." Here is a marked disagreement of doctors, but as Mr. Weed has been paying a good deal of attention to the details of army matters of late, we presume his exposition is the correct one. Mr. Weed says in conclusion: "Though "we have encountered a great and disastrous check—though we are pained and "humiliated—we possess the means and "the energy to retrieve all, if these means, "henceforth, are wisely employed. I may, "in a future Letter, indicate how, in my "judgment, these means should be employed." Now we protest against any more "military editors." Mr. W. devotes a whole column of his paper to inveighing against newspaper plans and finishes by proposing to write out his own ideas of how the commanding Generals should proceed. This will never do. There is great danger that Gen. McClellan will drop his own plans, adopt Mr. Weed's, and then charge all his disasters (if he should meet any) on the Albany Bessing Journal. Mr. Weed had better confine himself to contracts. These are his sposhould meet any) on the Albany Beening

the re-election of Gov. Kirkwood may be set down as an easy matter. The "People's" Conventions—as gross as they were harmless—in which the returning members of that Zouave regiment indulged on their arrival from Bull Run, we have ascertained upon authority that is indisputable, that either the New York 71st, the Wisconsin fid, the timesota or the Michigan regiments, was a more serviceable on a regiments, was a fact that the convention of the return of titled and the convention and the return of the return of titled and the convention are serviceable on a regiments, was a fact to the return of titled and the latter of the return of titled and the return of tit

ahall be very glad to do Justice to any institutions in Illinois that pay gold for their circulation; but until the banks named have some circulation out, it is not worth while to make any fuss about them. At the end of eight years business, the outstanding notes of the Bank of Galesia are less than ten thousand dollars, a large part of which, we may safely presume, have been lost or destroyed. How much the Bank of Bicomington has in circulation, we have no means of knowing exactly; but we shall be surprised to hear that it exceeds that of its Galena neighbor. Such being the case, we need not recommend a kind of money that, so far as the public is concerned, has no existence. And so of

kind of money that, so far as the public is concerned, has no existence. And so of the other hanks in the par list of the brokeers' classification. According to the Auditor's showing, they have a circulation out, that, in this emergency, if their owners would continue to redeem in coin, would be valuable. But, unfortunately for the public, that showing is fallacious. The notes of the banks have not been surrendered and the bonds withdrawn; but the banks have their own notes in their safes, and the people can get them when they banks have their own notes in their safes, and the people can get them when they consent to deposit a dollar of gold for every dollar of paper put affoat. We do not complain of this, because the bankers have a right to manage their business as they please, within the limitations of the law; and if they prefer to have their paper under their own control and lose the interest thereon, rather than to risk the chances of frequent redemption, that's

Hows, Republican Convention.

The Republican State Convention of Iowa which met at Des Moince on the Sist uit, was largely attend, and resulted, after a contest on some of the officers, in the nomination of the following ticket:

Governor—Sawmin J. Rinkwood, of Johnson county, present incumbent.

Limitation Governor—J. R. Northam, of Mahacha county.

Judge of Approved Court—Ralph P. Lowe, of Lee county, present during justice.

Lee county, present inite justice.

The re-nomination of Gov. Kirkwood, allouy to Mr. Raymond, there was to be no movement on Richmond at all. There was simply to be a garrison at Washington, and a grand movement with exactly ight pitched battles down the Mississippi view to New Orleans, and their great southvestern entrepot being taken, the rebels were to be made to "feel the pressure of the county conventions to demand a strict atherence to the "one term" rule, refused to budge, and, demanding another rule, for the county conventions to define the county county and the county county an

Mr. Bradbury has long been a favorité in
writing and compiling music books for calldren. The present volume will be found specially attractive. Of the aethor and the book, ially attractive. Of the aethor and the book, the Independent of a recent date says:

"We wish we could give all Sabbath school childrens peep into a beautiful cottage in New Jersey, where, in accept study, insuped up with music books in every language, and hanground with aleathers and memorities of composers, Mr. Bradbury sits hour after hour, and sometimes for into the night, with his plann before him, his pen and paper at hand, composing and teating those, charating melodies which are to ring from the happy voices of children in all the Sabbath echools of the land. His is a rare glit and a rare pleasure, in being able thus to mister to the training of the young in" the service of song. "Mach as he has accomplished in this line, never has he been more auccessful than in this new book of Sabbath school melodies. We have heard several of them sung, and & sow how well tany ring in the Sabbath school."

Worth county is new county taken from the north side of Sentry county, Alianwille is in this county and eight miles from the lows line, as deen aims a population of about 200. In Worth county there are sometwo or three hundred se essionists. The majority of the citizens in Allenaville and surrounding country are Union nen. Two noted secessionists in the vicinity, by the names of Dr. Maddox and Fanning, had seen holding public meetings at Pairview, nother small town south of Alienaville. These caders made very infammatory appeals to the recipie, accompanied with threats against the Julica men. Fissily word came that the essionists were coming up from Gentryville, dvancing with the intention of burning down lilenaville, and other wise injuring the Union men, and their they intended to compel the Julion men to take the each se support the The giffs were accepted, but only those haring the open seasons of admission could enter. The prisoners are confined in the second and upper story of the building. They are scattared about through the different rooms, of which there are some half doors; a de lachment of the Tweith Regiment N. Y. S. M. acting as guard. A more bettergeneous combination of men and dress can hardly be imagined outside of a masked ball. For diversity in size, installinguace and general appearance, they present an illustrious parallel to the reduction of the control of the control of the Gade Hill fight. Licut. Colonel Burtley B.
